To advance my professional abilities with vibrant administrator that offers challenging work, a respectful environment and growth opportunities

## PROJECTS

### FINAL YEAR PROJECT

**Sep 23 - July 24**

#### Secure Polls

E-voting system using blockchain

- Designed and implemented a blockchain-based voting platform to ensure tamper-proof and transparent election processes.
- Integrated secure storage and retrieval mechanisms for electronic health records (EHRs) within the system.
- Employed advanced cryptographic techniques to protect sensitive data and enhance system security.
- Conducted rigorous testing to ensure system reliability and user privacy.
- **Technologies:** smart contracts, cryptography, JavaScript, Ethereum network

### ECOMMERCE WEBSITE

**Oct 2022**

- Designed and implemented a front-end eCommerce website to ensure user-friendly and visually appealing interfaces.
- Integrated responsive design techniques for seamless functionality across different devices using HTML, CSS, and BOOTSTRAP.
- Developed interactive and dynamic features, such as the "Add to Cart" functionality, utilizing JavaScript.
- Created an About page to provide detailed information about the store and its mission.
- Built a Contacts page for easy communication with customers and inquiries.
- Designed a Home page to highlight featured products and promotions.
- **Technologies:** HTML, CSS, BOOTSTRAP, JavaScript.
